

## Weaver Consultants Group

In over 27 years, Weaver Consultants Group has grown to become one of the most experienced solid waste consultants in the country. We have a reputation for solving our clients' problems with innovative and cost-effective solutions by applying our extensive understanding of the local environment and regulatory requirements. Weaver Consultants Group has proven experience providing practical solutions for a wide variety of solid waste issues. We are constantly monitoring new regulatory trends to help our clients look ahead and plan their permitting strategies. Weaver Consultants Group continually strives to maintain this leadership position by responding to our client's need for innovation and cost-effective strategies.

## Landmarc Environmental Systems, LLC | Landfill Construction

Landmarc Environmental Systems (Landmarc) is a Landfill Construction Company that operates throughout the United States, specializing in Landfill Gas and Leachate Management Construction Services. Landmarc's Landfill Gas Drilling Division crews continue to set the industry standard for drilling and installation of LFG/leachate collection wells. Landmarc is fully equipped to complete landfill gas/leachate drilling projects in difficult environments.

## Anchor Construction, LLC | Industrial Facility Design/Build Construction

Our team will take one every aspect of your project. Anchor offers complete pre-construction, design, general construction, construction management and design-build services tailored to the exact needs of your project. Our ability to provide an in-house team of highly skilled professionals is what truly sets us apart in the industry. All engineers, architects and designers working on the client's project are Anchor employees. This expedites the design process and allows clients to have direct contact with the design team throughout the project. This same principle applies to on-site construction managers and project superintendents, allowing the client to get up-to-date construction information and progress throughout the entire construction process.

## Sligo Systems, LLC | Controls and Pumping Systems

We are the leaders in innovative solutions for solid waste facility operations, advancing electromechanical technology and products built to combat cost and hazard in the workplace. From custom-build leachate pumping systems, to live metering feed on your smart-phone, we provide the products and services that make your site run efficient, clean, and safe. Revolutionize the way you monitor your facilities, creating a compliance centric infrastructure, all while increasing efficiency and eliminating the need for physical surveillance.
